## Bachelor of Science HES-SO in Computer Science

*Study currently at Master HES-SO in Computer Science, until February 2013*

Involved and persevering, I wish to finish my studies by working on a concrete project, in a dynamic company. The WEB industry and its constant innovations fascinate me. During my training and through my work experiences, I gained many technical and interpersonal skills. Now, I aspire to use them to reach my medium term goal: be involved in a SME active in the WEB development.

**Programming:** JAVA, C#, C++, PHP  
**WEB:** JSF, Struts, ASP.NET, SharePoint

### Work Experience

- 2011 | present | WEB Service Manager** – College of Engineering and Architecture – Fribourg, Switzerland  
Web team management, project manager, contracts research and signatures, customer relationships – part-time, in parallel with the Master studies
- 2011 | 6 months | Scientific collaborator** – College of Engineering and Architecture – Fribourg, Switzerland  
.NET development as part of a PhD work on gesture recognition, part-time, in parallel with the Master studies
- 2010 | 3 months | Bachelor thesis** - Lawrence Berkeley National Laboratory – California, USA  
Development of algorithms and software enhancements for an old records recovery system. Goal: improve the extracted sound quality.
- 2009 | 6 weeks | IAESTE internship** – Netcetera – Skopje, Macedonia  
Development of an iPhone application used to locate themselves in the company building, thanks to Wi-Fi antennas
- 2007 | 8 months | WEB developer** – Web Team of College of Engineering and Architecture – Fribourg, Switzerland  
Development of a new CMS with Java EE for the website of the College of Engineering and Architecture of Fribourg. Developer for various WEB projects. These works continued from 2007 to 2010, in parallel with my studies, during holidays and weekends.
